PROFILE

Senior QA Engineer / QA Lead with 7+ years of experience driving quality across SaaS, mobility, e-government, and banking products in agile environments. Specialized in test automation, release readiness, API validation, performance testing, and cross-functional quality strategy. Proven track record in building and scaling automation frameworks, improving release efficiency, increasing test coverage, and mentoring QA teams. Hands-on with Selenium, Cypress, Maestro, Postman, JMeter, k6, Java, JavaScript, and TypeScript.

PROFESSIONAL EXPERIENCE

10/2025
Vienna, Austria

iMobility GmbH | ÖBB-PV

Quality Assurance Manager

- Lead QA ownership for biweekly releases, go-live readiness, release risk assessment, and quality reporting across mobile and backend-related product areas.
- Coordinate regression, smoke, exploratory, and release testing activities across Android, iOS, APIs, and external mobility provider integrations.
- Manage bug backlog visibility, severity assessment, prioritization, and follow-up with product owners, developers, and stakeholders.
- Maintain and expand Maestro-based mobile automation suites, improving regression coverage for critical user journeys and partner integrations.

01/2023 – 09/2025
Vienna, Austria

CELUM GmbH

Senior QA Engineer

- Designed and executed manual, exploratory, API, integration, and automated tests across SaaS platform features.
- Built Selenium-based BDD automation and increased test automation coverage from 0% to 70%.
- Tested backend-connected features, APIs, permissions, search, indexing behavior, and system integrations using Postman, Swagger, Elasticsearch, and browser debugging tools.
- Created structured test documentation, release evidence, regression summaries, and risk-based quality updates for stakeholders.

01/2020 – 12/2024
Tirana, Albania & Remote

ikubINFO Academy & Software Development Academy

Software Testing Trainer

- Delivered 80+ instructor-led training sessions to 350+ students in manual software testing and test automation.
- Trained students on test design techniques, user story analysis, acceptance criteria, bug reporting, API testing basics, and automation fundamentals.
- Coached students on Selenium, Java, BDD concepts, regression testing, and real-world QA workflows.
- Prepared learning materials, practical QA exercises, assignments, and evaluation tasks.

10/2018 – 12/2022
Tirana, Albania

ikubINFO

Senior QA Engineer

- Tested 12+ e-government systems across functional, regression, integration, API, and system testing scopes.
- Built and maintained 2000+ automated tests using Selenium, Cypress, SpecFlow, and BDD frameworks, increasing automation coverage from 0% to 80%.
- Performed API validation with Postman and Swagger, and used SQL queries to verify backend processing, integrations, and data consistency.
- Created test plans, test cases, defect reports, regression evidence, and mentored junior QA engineers across delivery teams.

11/2017 – 10/2018
Tirana, Albania

Raiffeisen Bank Albania

Full-Stack Web Developer

- Supported the redesign and improvement of an internal contract management system in a banking environment.
- Developed internal web features using JavaScript, .NET, AngularJS, and SQL-backed workflows.
- Collaborated with business users, developers, and stakeholders to improve usability, workflow efficiency, and internal process quality.
- Gained practical experience with banking systems, regulated environments, structured documentation, and internal application delivery.

EDUCATION

2018 – 2020
Tirana, Albania

MSc. Computer Engineering & IT / Network and Cyber-Security
Canadian Institute of Technology 

2014 – 2017
Tirana, Albania

BSc. Software Engineering
Canadian Institute of Technology 

LANGUAGES

English — Fluent

Italian — Conversational

Albanian — Native/Bilingual

CERTIFICATES

ISTQB Foundation Level (CTFL)
AT*SQA
Credentials: **21-CTFL-00377-USA**

Software Tester (CSTE)
BrainBench
Credentials: **14265654**

Software Quality Assurance

Credentials: **14265655**

PROJECTS

02/2026

AI-powered QA workflow using Claude
Built an AI-assisted QA workflow using Claude to review code changes, validate updates, create pull requests, and trigger automated test execution before merge.

CORE COMPETENCIES & TECHNICAL SKILLS

Testing: Test Automation, Regression Testing, Smoke Testing, Integration Testing, System Testing, Performance Testing, API Testing.

Tools & Frameworks: Selenium WebDriver, Cypress, SpecFlow, Cucumber, BDD Frameworks, JMeter, k6, Postman, Swagger.

Programming Languages: Java, JavaScript, TypeScript, .NET, AngularJS.

DevOps & Platforms: Azure DevOps, Git, Elasticsearch, Redis, Agile/Scrum.

Other Skills: Test Planning, Continuous Integration (CI/CD), Instructor-led Training, Mentoring.

SOFT SKILLS

- Communication & Collaboration
- Accountability & Reliability
- Time Management & Prioritization
- Analytical Thinking
- Adaptability & Flexibility
- Initiative & Proactiveness
- Problem-Solving
- Growth Mindset & Continuous Learning
- Mentoring & Knowledge Sharing
